**Flink Works LLC- Maintenance
partner for smart card industry.**

Machine Inventory for sale.

Company Introduction

Flink Works LLC is a company dedicated in providing R&D, engineering and maintenance services for card personalization industry.

Established in 2015, as a one-man company, we offer consultancy, technical support, troubleshooting sales and maintenance services for smart card machinery, mainly by:

Maticasystem, Neopost, Francotyp Postalia, Mühlbauer, and Rofin Sinar lasers.

Services

Sales, installation, training and support of card personalisation machinery and software by Matica Group. www.maticatech.com

Our wide partner network enables us range of services.

We offer unique machinery set-ups with exceptional value, including:

- Machinery on site set-up, user training, technical training.
- Custom-ordered machinery consumables according to customer requirements (Envelopes, card carriers, sticker-labels; ribbons for thermographic printers, also for tipper and infill modules).
- Machinery customization for specialty consumables (transparent cards, special envelopes etc).
- Machinery software modification for special applications.
- Unique service contracts including spare parts, training and consultancy.

Feel free to browse our current machinery offers ready for dispatch with set-up, spare parts and training.

Background and experience

I am a mechanical engineer with aviation background, factory trained at Maticasystem Italy; Neopost HQ Loughton UK; Mühlbauer HQ Roding, Germany.

Besides 10 years of experience with supporting Trueb Baltic AS (Part of Gemalto- Thales DIS group) machinery park of 31, i am skilled also in medical and printhouse devices.

I speak 3 foreign languages in following skill: English- good, Finnish and Russian medium.

I am qualified and experienced with different levels of maintenance from the smallest surgical tasks to big machinery installation.

Your malfunctioning machinery nightmare is our challenge, which we face with dedication. Feel free to ask us an offer for maintenance intervention.

With warmest regards,

Indrek Soomre,
Executive mechanical engineer
